How to Use This Report

1 Start with your Primary

Your primary temperament is the most reliable guide to your natural instincts. Begin by deeply understanding its strengths — they are your most reliable tools in any season of life.

2 Honour your Secondary

Your secondary temperament adds texture and nuance. It often shows up most clearly in your closest relationships and under pressure. Understand how it modifies and complements your primary.

3 Revisit your Growth Areas

The growth opportunities in this report are not criticisms — they are invitations. Revisit them regularly. Personal growth is not a one-time event; it is a lifelong practice.

4 Share with Someone Who Knows You

Ask a trusted friend, partner, or mentor to read your profile. Their feedback on whether it rings true — and where it doesn't — is invaluable data about your self-awareness.

5 Apply it to your Relationships

Use the relationships section to open better conversations with the people you love. Understanding one another's temperaments dissolves many misunderstandings that felt like moral failures.

6 Return to it in Different Seasons

Your temperament doesn't change, but your expression of it does. A report read at 25 hits differently at 40. Retake the assessment every two to three years to track your growth journey.
